SUBJECT: Reference: Western Slope Utilities

Gentleman,

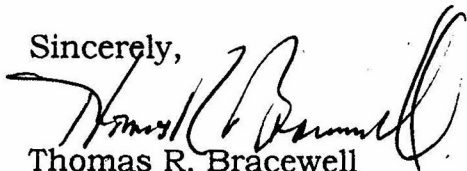

Western Slope Utilities has successfully completed both conventional pipe replacement and cured-in-place-pipe contracts for the Aspen Consolidated Sanitation District for the past ten years. A number of these projects were difficult to construct requiring extensive by-pass pumping.

We have not had to call upon WSU's bonding agents to remedy any project discrepancies.

Western Slope Utilities has consistently performed to the standards required by Aspen Consolidated Sanitation District's specifications.

We have been pleased with the quality of WSU's work and look forward to continuing the professional relationship with Western Slope Utilities well into the future.

Sincerely,

Thomas R. Bracewell
Collection Systems Superintendent
